-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 September 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Claims 4-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Applicant timely traversed the restriction (election) requirement in the reply filed on September 22, 2006.

2. Applicant's election with traverse of Invention I in the reply filed on September 22, 2006 is acknowledged. The traversal is on the ground(s) that "There have been no references cited to show any necessity for requiring restriction . . .". This is not found persuasive because the basis for restrictions is not whether or not references are cited to show necessity for the restriction.

The basis, as stated in the previous action, is whether or not the inventions are distinct from each other if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h).

With respect to newly added claim 13, contrary to applicant's assertion reads on non-elected Invention II.

The requirement is still deemed proper and is therefore made FINAL.

Priority

3. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

4. Receipt is acknowledged of the Information Disclosure Statement (IDS) received January 28, 2005, March 8, 2006 and August 21, 2006.

Specification

5. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Choi et al (US 2005/0097591). As per claim 1, Cho et al shows in figure 3 a disc cartridge including an upper case 210 and a lower case 220 that forms an internal space therebetween to accommodate a disc. The lower case 220 includes a pair of elastic protrusions 140 that are formed at sidewalls of the lower case 220 and are elastically biased toward the internal space so that ends of the pair of elastic protrusions 140 support the disc. Figure 3 of Choi et al shows surfaces formed at the ends of the pair of elastic protrusions 140 to slope toward the internal space so that the disc is located in an upper portion of the internal space and supported by the pair of elastic protrusions 140.

Art Unit: 2627

Figures 5-7 shows that the disc descends on the surfaces when the pair of elastic protrusions 140 are opened and the disc is then located in a lower portion of the internal space.

As per claim 2, figure 3 shows the pair of elastic protrusions 140 extending from the sidewalls of the lower case 220. As per claim 3, figure 3 shows openings formed in the upper case 210 and lower case 220 to allow an optical pickup to access the disc through the openings.
